

## REMARKS

The specification at page 4 and claims 1 and 4 have been amended to correct minor errors. In particular, claims 1 and 4 have been amended to correct a grammatical error and claim 4 and the specification have been further amended to correct an error in a characterization of the invention. No new matter has been added

Referring to Fig. 2, and as is clear from the specification and Fig. 2, an end portion of the ground electrode (52), not the encapsulating resin (40) as erroneously stated in claim 4, is a connection electrode of the coaxial cable connecting connector. Thus, the amendment to claim 4 reflects the intended scope of the claim and accordingly should be entered.

Should the Examiner feel that a telephone conference would help to expedite the prosecution of this application, the Examiner is hereby invited to contact the undersigned counsel to arrange for such an conference.

Respectfully submitted,
